

AIR FRANCE KLM MARTINAIR CARGO PARTNERS WITH GOLDEN SUPPORT TO ENHANCE AIR CARGO OPERATIONS WITH UNIQUE SKYTRUCKS RFS SOLUTION

SkyTrucks is set to manage RFS operations across 80 US locations, including five key "super stations."

Prague, 20 June 2024 – Golden Support is thrilled to announce the signing of a landmark contract with Air France KLM Martinair Cargo (AFKLMP Cargo) to implement its unique IT Road Feeder Services solution, **SkyTrucks**, into AFKLMP's air cargo operations across the United States. This collaboration, extending the business based on the existing relationship, marks a significant milestone in optimizing and streamlining air cargo logistics for one of the world's leading airline groups, leveraging a solution unparalleled in the market.

The implementation of SkyTrucks will address the challenges faced by AFKLMP Cargo in managing RFS operations across approximately 80 locations in the USA, including five key "super stations" that oversee smaller regional airports. The system's unique scalability and flexibility allow it to adapt to the varying needs of each station, whether they utilize a single contractual carrier or engage in the auction workflow.

SkyTrucks, initially developed six years ago and significantly expanded last year, is a one-of-a-kind system designed to manage Road Feeder Services (RFS) for air cargo. It automates and simplifies the complex workflow of coordinating ground transportation by generating RFS routes based on booking details and sending transportation requests to carriers, enabling them to respond with vehicle type, availability, and pricing in a competitive auction process, minimizing costs. SkyTrucks then pairs transportation orders with invoices, verifies that the invoiced amount matches the contracted price, and forwards it to the airline's financial system for payment. Additionally, it offers robust reporting capabilities, providing unmatched oversight and control over the RFS process.

Golden Support's Chairman of the Board, Jan Korol, commented on the partnership, stating, "We are excited to collaborate with Air France KLM Martinair Cargo once again, this time to bring our SkyTrucks solution to their extensive air cargo network in the USA. This partnership underscores our commitment to providing innovative solutions that enhance operational efficiency and reduce costs for our clients. SkyTrucks is truly a game-changer in the industry."

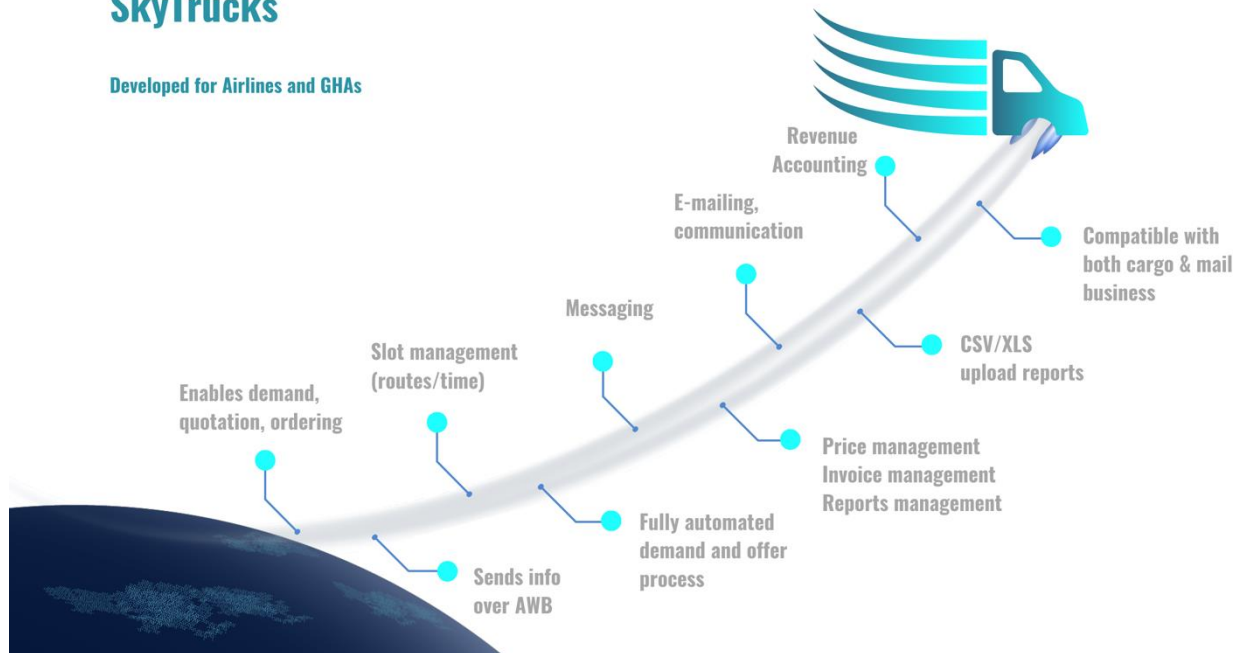

As Air France KLM Martinair integrates SkyTrucks into its air cargo operations, the airline is poised to achieve greater efficiency, improved coordination, and cost savings, with a solution that no other provider can match.
